Recently become more and more lazy. May be the reasons for the summer. Particularly vulnerable to the storm. Just do not want to move, leading to buy a lot of things been ten. Rare and some fresh, had to share with you the next I recently bought this Coco Chanel Bags is not a good thing I do not normally issued the day before yesterday, my mother bought. Of course, I am like the Chanel bag, but today is my first time writing posts, you may not write bad, but something is definitely good. I have not bought so I like the Chanel bag. Well crap, first on the map:

The shoulder bag has a quilted diamond or herringbone pattern on The exterior. Using a running stitch, this gives the bag shape and volume. Many sizes for you to choose. Combined with rose color and the most famous style 35899, the pattern is believed to have been inspired by several sources. Get the rose 35899 gold zipper shoulder bag for your high class tastes rather than common bugs. Fabric: Chanel top quality leather, special logo, with a series of identity cards, brochures, and serial number.
